PEACE OF MIND: INTEGRATED SMART SECURITY SOLUTIONS FOR LOCAL TAP HOUSE

How BomaShield Security created a comprehensive security solution leveraging technology from Alarm.com and Qolsys / DSC

ABOUT OUR CLIENT

Wildwood Tap House is a popular destination for craft beer lovers in the Portland area. The bar has an ever-changing selection of taps, featuring over 20 craft beers on tap from local and regional breweries. In addition to beer, Wildwood also offers ciders, local wines, ice-cream, bar snacks and a bottle shop.

Wildwood has 2 locations in the Hillsboro / Cedar Mill area. Wildwood is a great place to catch a game or meet up with friends. The friendly staff and cozy atmosphere make it a popular spot for locals and visitors alike.

THE CHALLENGE

Andrew and Will from Wildwood Taphouse approached BomaShield because they were looking for a security solution for their 2 locations that would give them the ability to integrate their alarm systems with video cameras as well as make sure their video systems can be monitored from a central station in real time.

THE SOLUTION

BomaShield created a solution using the IQ4 alarm panel from Qolsys/DSC, integrating video from Alarm.com.

Specific solutions implemented include:

- Enterprise dashboard
- 24/7 onsite storage
- Automatic rearming schedules
- Mobile application
- Management and reporting tools

THE RESULTS

Enterprise Dashboard

Andrew and Will have the ability to remotely view multiple location alarm systems and video clips, from single app login with Enterprise Dashboard

Flexible Access

Cameras can be viewed by management, anywhere with their mobile phones or computers

Automatic Rearming Schedules

Automatic open and close rearming schedules make sure the alarm systems are armed every night and disarmed during business hours

Mobile App Management

The owners can create or remove employee alarm user codes within seconds from mobile apps

Open & Close Reports

Managers receive weekly open/close reports to make sure locations are opened and closed on time

IQ4 alarm panel from Qolsys/DSC

Hybrid Video Solution

With 24/7 on-site storage integrated with cloud storage for critical video clips

Real-time Dispatch

If an alarm is triggered, BomaShield's central station operators will view the cameras in real time, ensuring police are dispatched appropriately

Push Notifications

Managers get push notifications to their phones, if locations close late

CONCLUSION

Using technology from Alarm.com and Qolsys/DSC, BomaShield was able to provide Wildwood Taphouse' owners peace of mind knowing their locations are secure and safe for employees and guests.

Instead of having to use multiple apps for our security systems, BomaShield gives us one platform which just works and saves us a lot of time.

ANDREW
